Thousands of acres for cotton is now being plowed too wet. This means a very large reduction in the number of bales next Fall.

About all the cotton farmers have to do in order to control the cotton market is to control themselves.

We don't need more money, more men or better business men in the cotton States in order to manage the cotton business.

ton States in order to manage the cotton business. About all you need is to get together and use what you already have in hand, like business men should do, and the power you have will astonish the cotton farmers as well as the balance of the world.

Why is it that we find so many Southern men engaged in the cotton trade on Wall Street, New York? Is it not because these Southern men from the field know more about the conditions of things in the South and more about how to control the cotton farmers than foreigners do?

Well, then, why not come together at home and use our own benefit instead of allowing foreigners to reap the

Twenty men may stand about the bog talking about the bad plight of the cow in the mire to no good—but three men may unite and pull together and out comes the cow on firm ground. Farmers, walk right in the Union and take hold, stop talking and pull to-

Cotton Warehouse or the Poorhouse-Which Do You Prefer?

For many years cotton producers have been producing money making cotton crops, but in placing the cotton upon the market all others in the cotthe busicess have become rich, while the Southern cotton producers, as a rule, have remained poor.

There is but the one course for this, and here it is: Most any common clod-

tors from reaping all the profits.

These speculators have applied a code of business rules and methods or system in handling your cotton crops that producers have failed to do for themselves. These men have supplied the cotton warehouses and the business organizations for the purpose of distributing your cotton among cotton manufactures and have, as might be expected, reaped their profits in money while the producers of cotton have stood aloof from concert of action and took their profits out in grambling and

Some farmers claim that they approve of the warehouse plans, but they can't raise the money for the stock; well, now, I deny this. In many cases this is not true. We know good and well that if some would try, they could get up this warehouse stock just as well as they get up other things that are not so important.
